

① Design Amazon / Flipkart

I. Functional Requirement

1. As a user, they should be able to search products.
2. User should be able to add products in their watch list and carts.
3. User should be able to view their current orders & historical orders.

4. There should be a recommendation of products which should be shown to a user.

② Non Functional Requirement :-

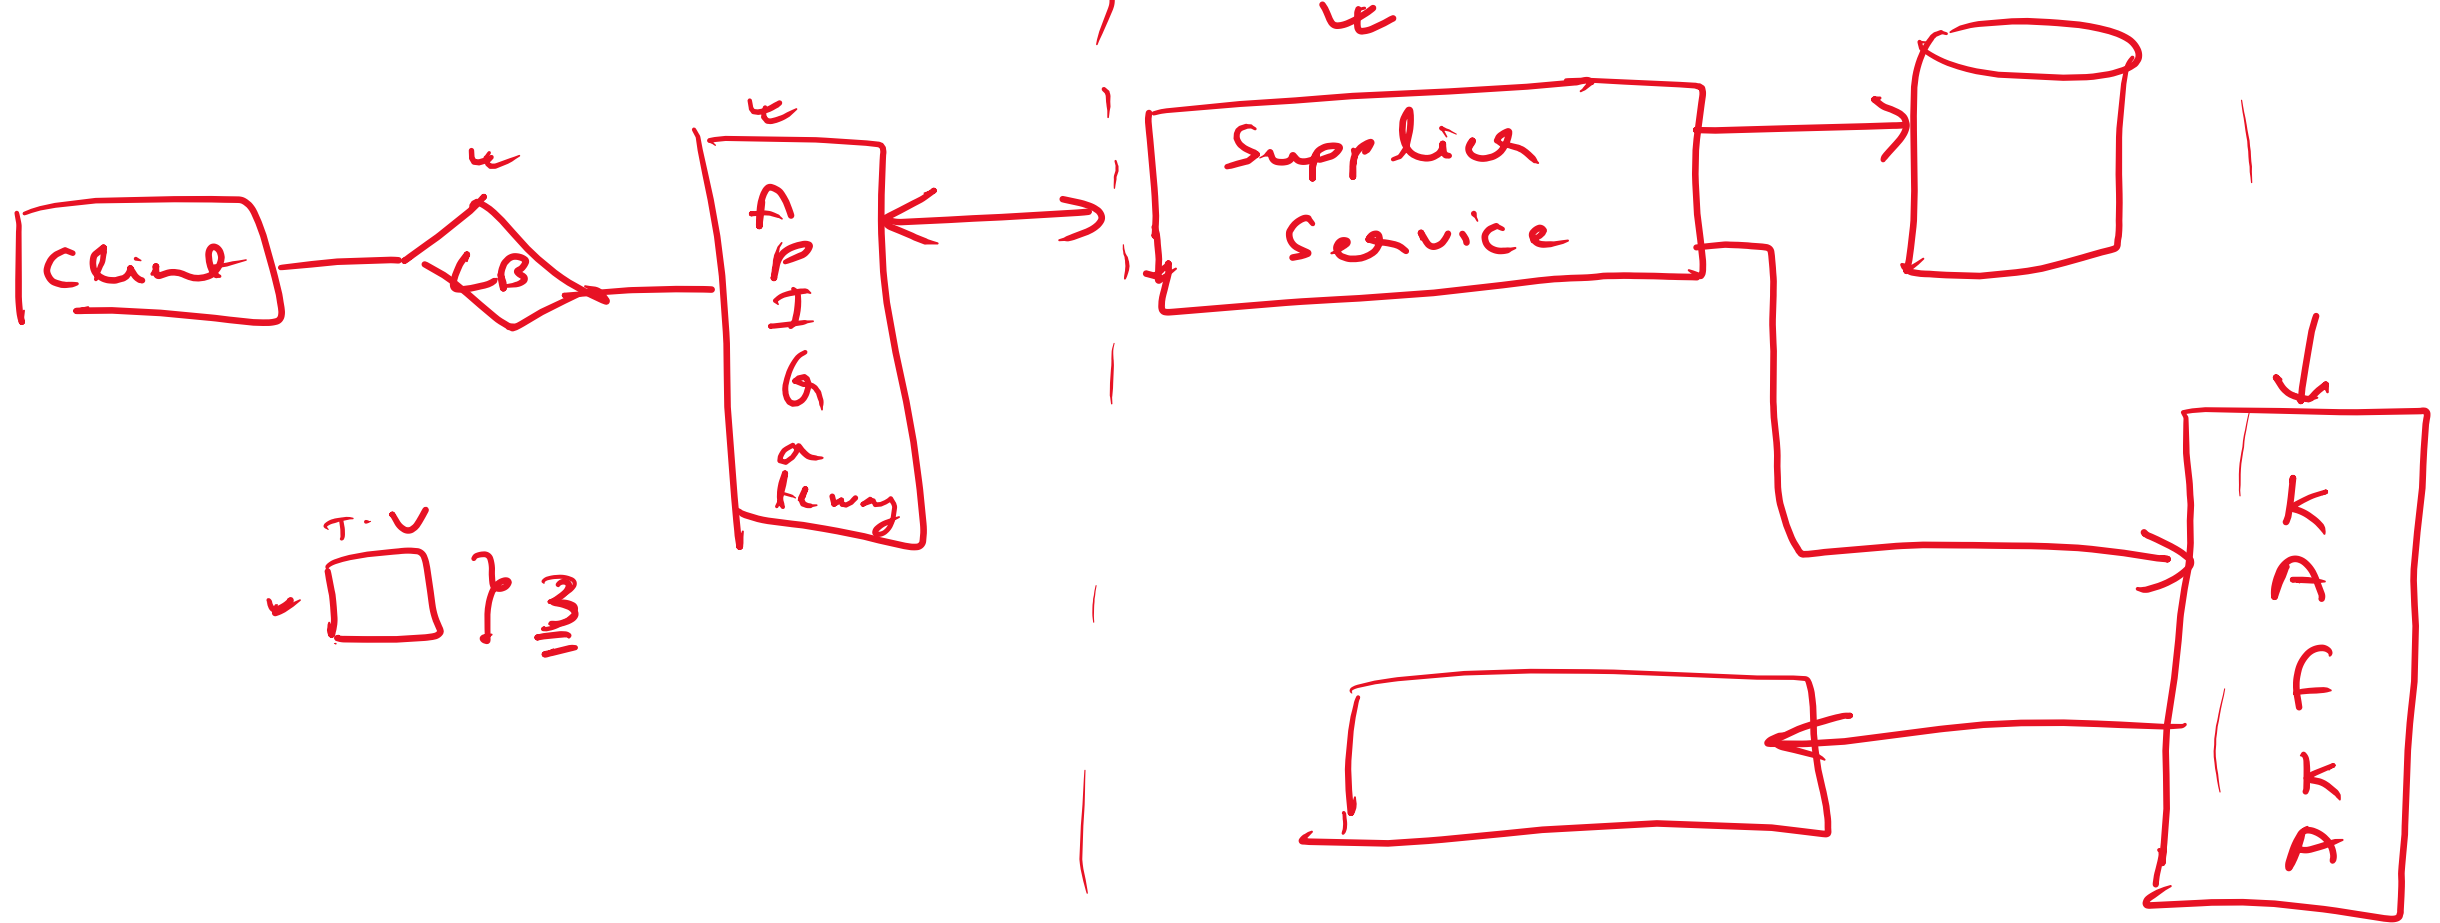

1. Scalability
2. Highly Available
3. Eventual Consistency
4. Fault Tolerant
5. Low Latency.

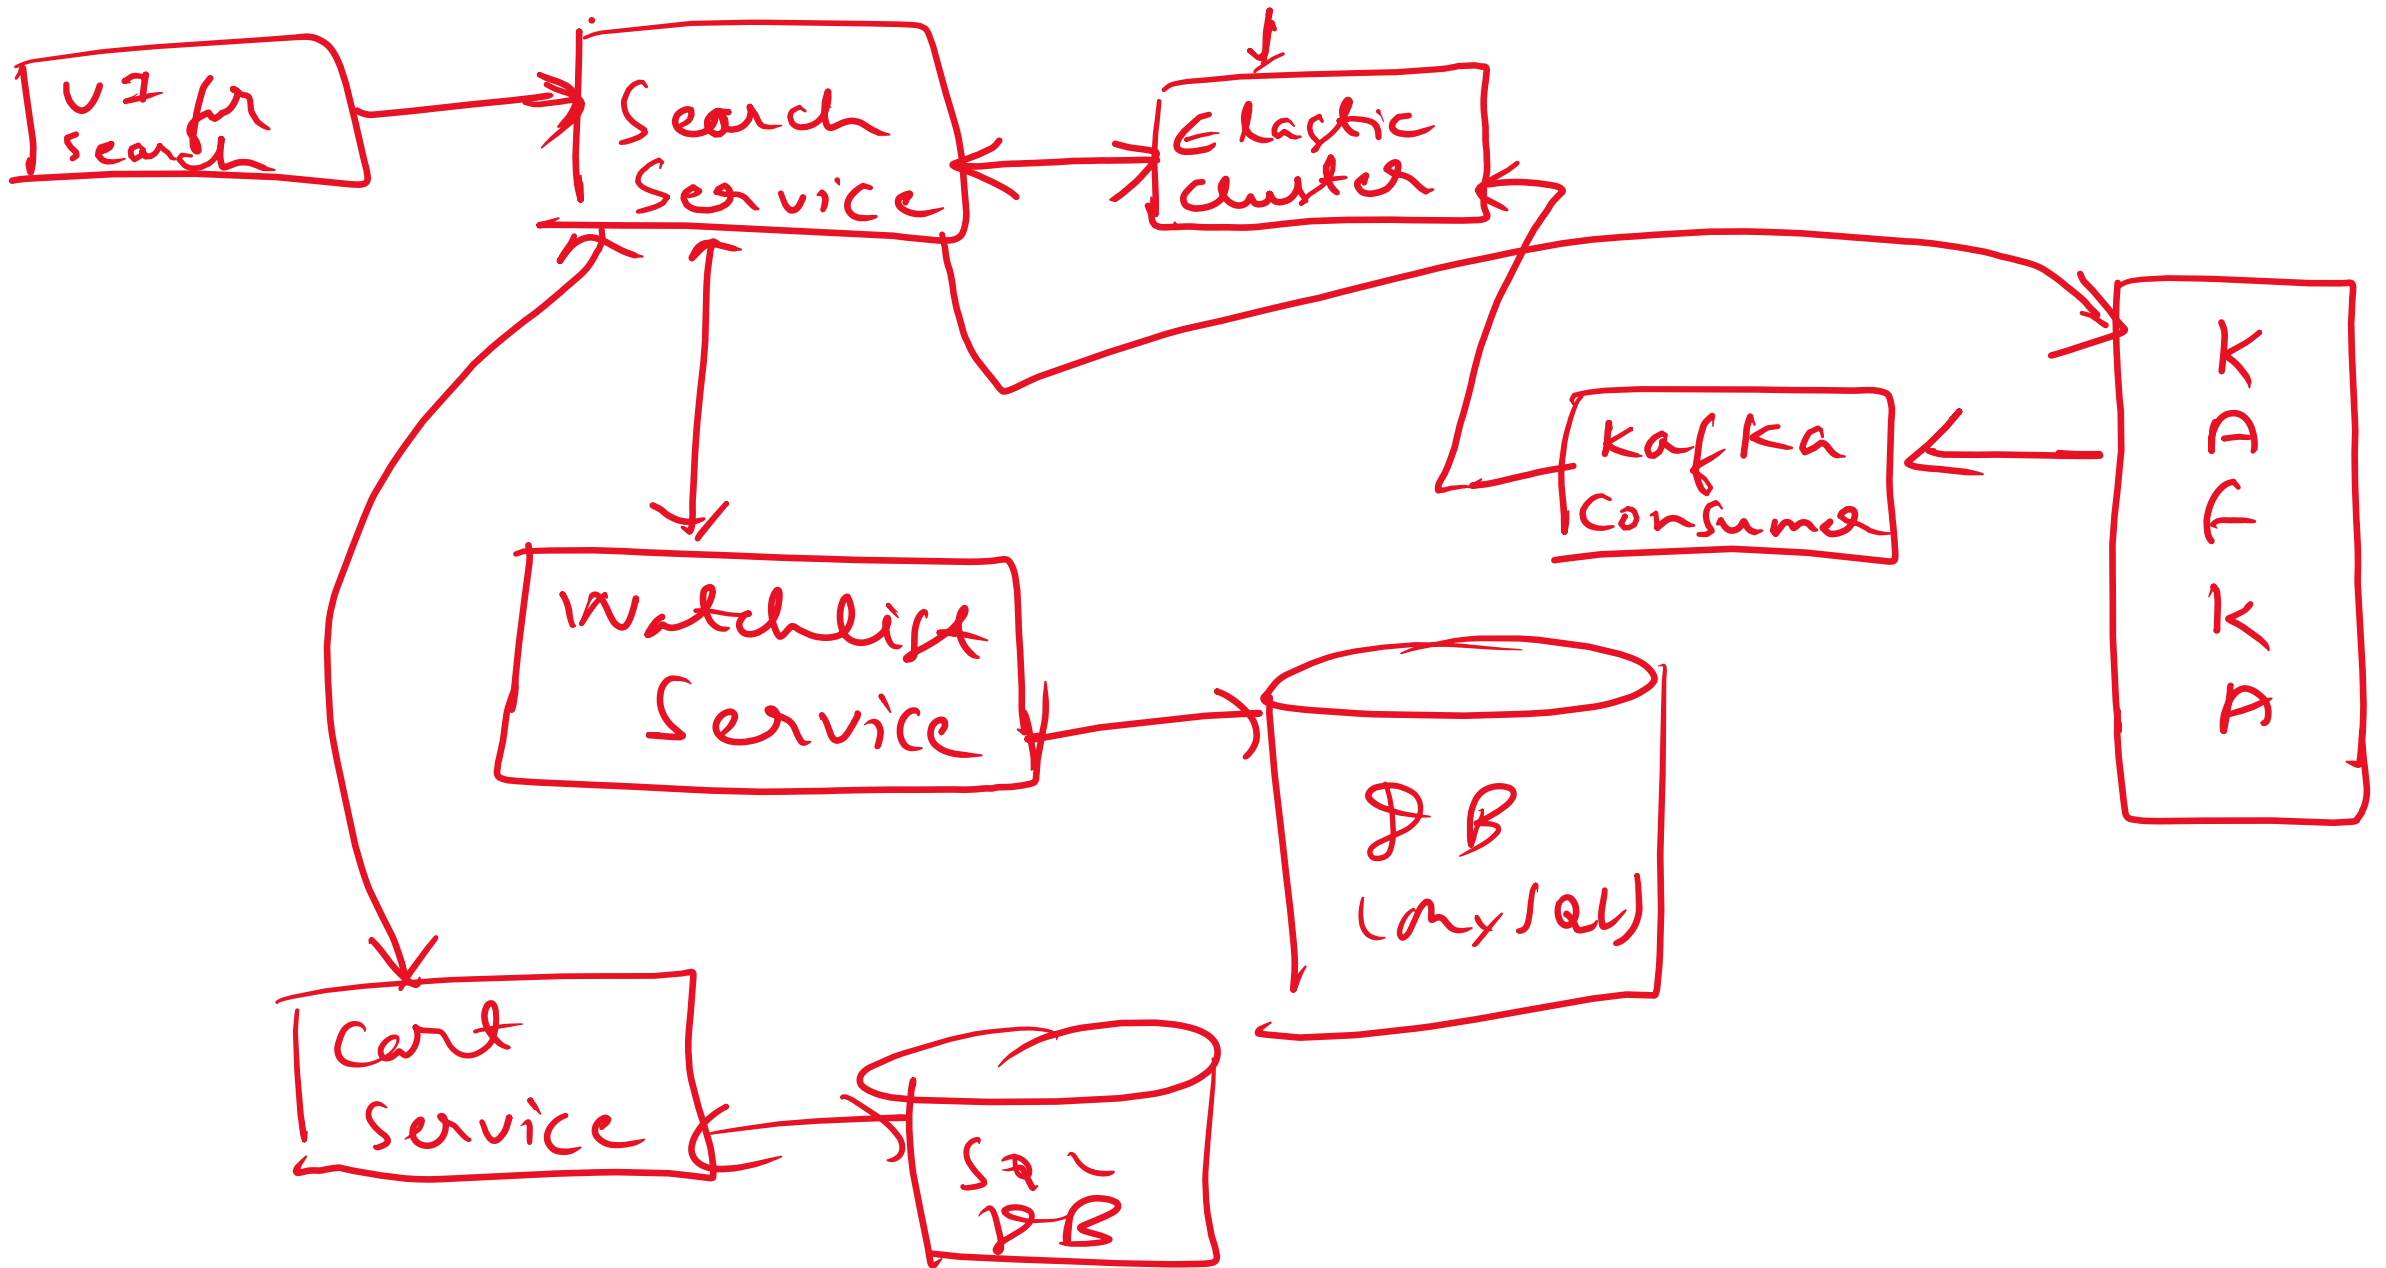

① Capacity Estimation! -

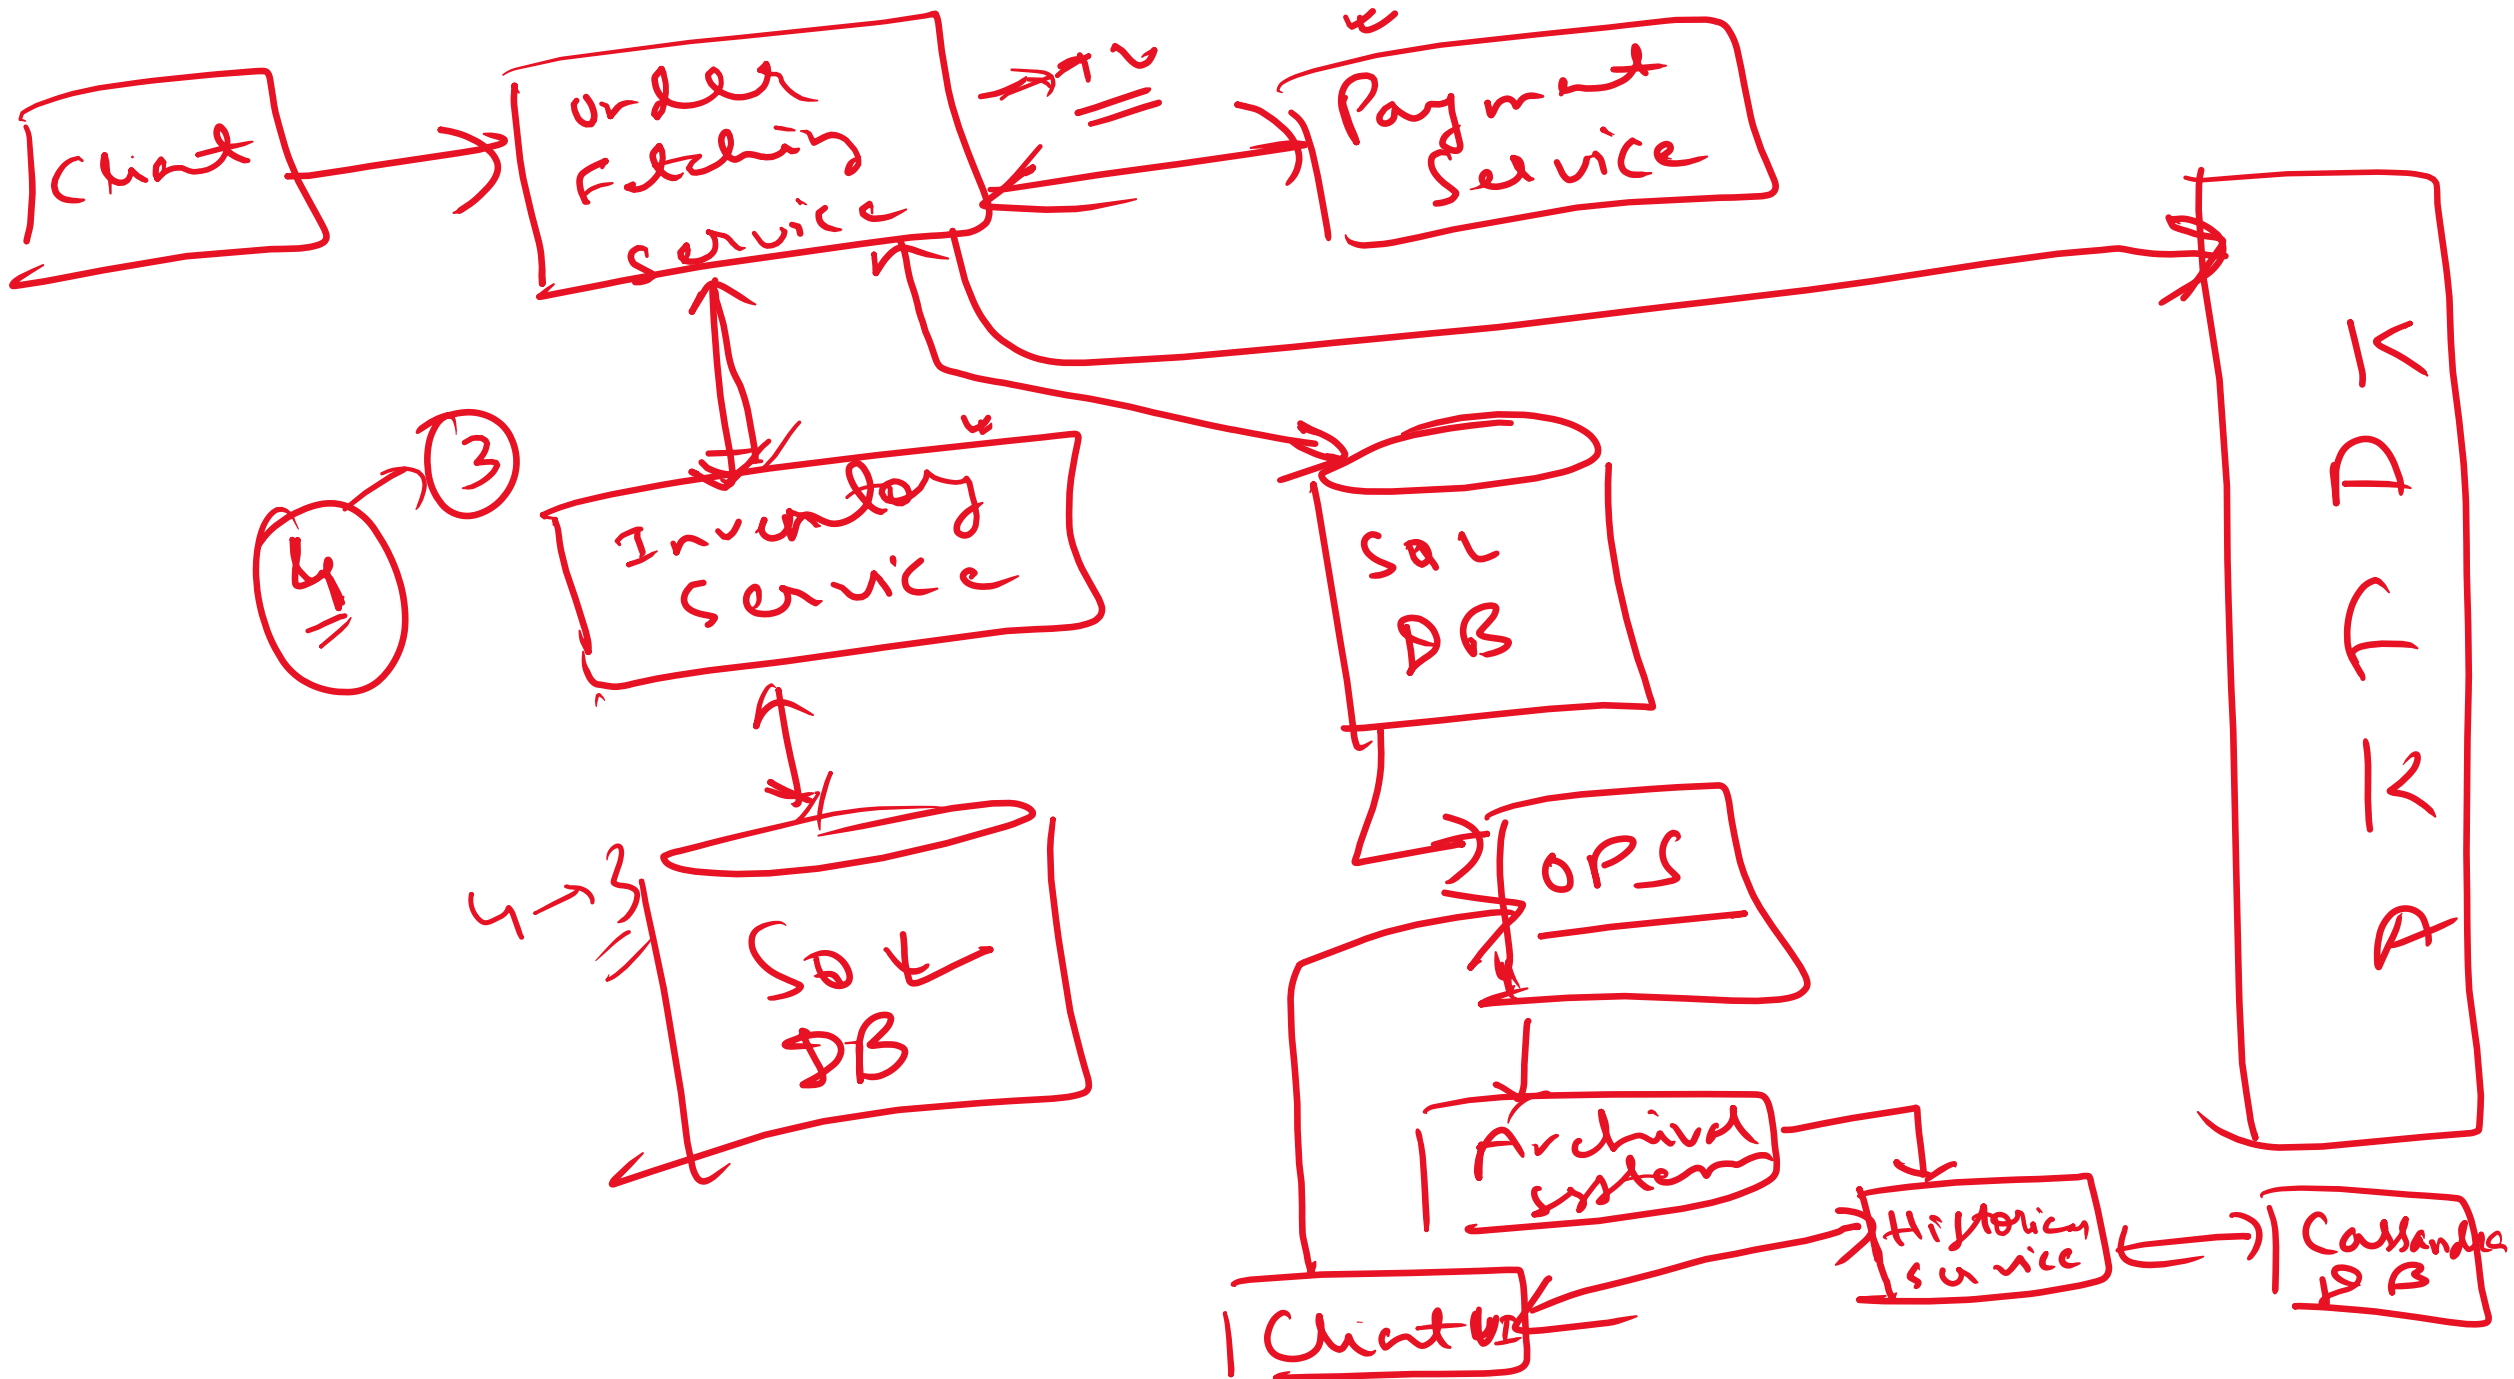

1. DAU :- ~ 25 million

2. MAU :- ~ 200 million

② Backend Services :-

Recommendation :-

Trick
